About Our Programs

The skills developed in our Programs will enable you to start or enhance your own holistic healing business; integrate holistic therapies in your work as a doctor, nurse, massage therapist, or any other healing profession; or offer your holistic healing skills in other professional capacities. Considering that similar programs may cost thousands of dollars more, this program is unequivocally an amazing value. Express the essence of who you truly are with our Programs. **Make Your Vision A Reality.**

Note: Our programs can also be taken for personal reasons only – for those who wish to gain holistic health knowledge and skills for themselves and their families.

Complementary and holistic healthcare is preventative, treating the cause and the whole person rather than just the symptom. With large numbers of people partaking in a wide array of holistic treatments, it is indeed an opportune time to study and become gainfully employed in this field.

Nancy Barnes, the Director of College of Holistic Health LLC, is a Certified Instructor and a Board Certified Holistic Health Practitioner.

Why Choose Home Study?

Numerous individual testimonials have been offered over the years attesting to the benefits of distance education. Beyond these claims, formal studies have been conducted to measure the effectiveness of the distance education method. All research published since 1920 has indicated that correspondence/distance study students perform just as well as, and in most cases better than, their classroom counterparts.

Distance learning has definite advantages over face-to-face instruction when it comes to teaching and learning, according to an analysis by the U.S. Department of Education.

Read report - <http://www2.ed.gov/rschstat/eval/tech/evidence-based-practices/finalreport.pdf>

The Federally-conducted study found that students who took all or part of their instruction online performed better, on average, than those taking the same course through face-to-face instruction.

Our Purpose

College of Holistic Health is dedicated to training and educating students for competent and professional services in the areas of energetic studies, and holistic healthcare practices.

Philosophy

College of Holistic Health endeavors to *immerse* the student in the *experience* of energy including the philosophy that *learning* is holistic, therefore actively engaging the mind, body and spirit of the student. The training will focus on aspects of preventive and holistic health education.

Mission Statement

The mission of College of Holistic Health is to provide a curriculum that assists in preparing competent practitioners of Holistic Health, Wellness and Energetic based studies. College of Holistic Health works diligently to provide a positive educational experience that honors student diversity and the right of each student to learn through a holistic approach. We seek to make holistic healthcare practices readily available to the general public, to healthcare professionals and to all students who desire this training.

Objectives

- For students to gain a deeper understanding of the various stress reduction skills, energetic balancing, and holistic healthcare techniques.
- To guide students in combining different modalities into an integrated holistic session.
- To support students in the exploration of the intimate connection between body, mind and spirit with respect to physical health or illness, while examining the psychospiritual influences behind illness.
- To introduce students to the basic requirements in business management, ethics and communication to allow for the development of a successful practice.
- To assist students on their personal and spiritual journey in becoming a professional Holistic Health Practitioner.

Our Program

- Promotes health, healing, joy, meaning, awareness, and appreciation.
- Provides exceptional natural healing or holistic health education.
- Provides premier instruction and services at the most affordable fees.
- Enriches physical, emotional and spiritual well-being and healing of students and clients
- Assists students to become more effective, sensitive and skillful practitioners.
- Deepens our connections: to ourselves, our community, and to our living planet.

Program Objectives

Students will gain a basic understanding of holistic healthcare and prepare to become practitioners for modalities such as Reiki, Reflexology, Chakra Balancing, Meditation, Hair Analysis, Nutrition, and Fitness. Students will develop skills in a variety of modalities that are within the extent of Holistic Health Practices. These skills will prepare students to utilize holistic practices. Holistic Health, as a growing field within healthcare, will serve to provide education to the public on the benefits of wellness and preventive care.

Legal Disclaimer

Energy-based healing modalities are not intended as a replacement for traditional medical care. They are considered complementary therapy to be used adjunct with tradition medical care. Clients should check with their physician before receiving consultations or sessions.

Employment Outlook

There is no one statistical prediction for Holistic Practitioners. However, the U.S. Bureau of Labor Statistics (BLS) does have data for a few of the specialties. For example, the BLS predicted that chiropractic jobs would increase by 20% from 2008-2018. For that same period, the BLS expected jobs for massage therapists to grow by 19%. Both predicted growth rates are higher than the average anticipated growth for all occupations (www.bls.gov).

Holistic Health Careers are beginning to be recognized in the medical community as natural healing arts that promote wellness through disease prevention. In fact, according to a National Health Statistics report, "Approximately 38 percent of adults in the United States aged 18 years and over, and nearly 12 percent of U.S. children aged 17 years and under, use some form of

complementary and alternative medicine (CAM)." As these healing methods continue to become integrated with mainstream health care, the outlook for careers in the natural healing field remains strong. This is why alternative medicine careers have seen such tremendous growth.

CHH Students were/are:

Massage Therapists/Teachers, Estheticians, Nurses, Fitness Trainers, Business Owners, Counselors, Intuitive Readers, Herbalist, Yoga Instructors, Meditation Instructors, and other Professional and Non-professional people. Many Students take our Program to enhance their existing career, study new courses, or to work independently.

The Right to Practice

Please check your state for specific regulations and guidelines. We advise you to become ordained as a Minister which will broadly expand your scope of practice. The online ordination we recommend is legal and allows service as a Minister. As an ordained minister in the USA, you will be protected under the Constitution.

Many states do not require licensing for bodywork. The owner of a Massage School in Ohio suggests a practitioner become ordained to allow the practice of bodywork without being licensed after they receive training. Even though state laws in Ohio state that you must have a license for massage. His school (and other schools) teaches Ethical Massage, Reflexology, and Polarity Therapy which does not require obtaining a license. He does suggest asking for a ‘Suggested Donation’ for Massage work. Additionally, in Ohio an Esthetician is also allowed to practice Massage with their Certification, but are not allowed to do Medical or Sports Massage.

Reflexology may require licensing in some states. If you already are a Nurse, Doctor, Health Practitioner, Massage Therapist, Acupuncturist, you may be allowed to practice under your present License or Certification. Licensing allows the right to touch and protects clients by strict regulations.

There may be the option of practicing under the rights as a Reverend which allows freedom of

rights. A practitioner often practices under a physician or chiropractor. Due to restrictions and government control, you may prefer to not be licensed. However every Practitioner should have liability insurance.

Ordination

You may apply for Ordination from Universal Life Church, American Fellowship Church, or another Spiritual Organization anytime during the program. As a legally ordained minister, you will be able to perform weddings, funerals, baptisms and other functions of the clergy.

Ordination may protect your scope of practice as a Holistic Health Practitioner. Our common thread is our adherence to the universal doctrine of religious freedom: "Do only that which is right". We believe that every person has the natural right (and the responsibility) to peacefully determine what is right. We are advocates of religious freedom. You should be able to pursue your spiritual beliefs without interference from any outside agency, including government or church authority. Ordination is very important to obtain in order to practice healing.

Liability Insurance

Student Insurance is available from ABMP for only \$45, which includes a website and coverage up to 12 months. Insurance is a requirement to practice on other people during your enrollment. An application can be submitted through College Holistic Health, or apply directly to ABMP with our school code; please contact us for that information.

HOLISTIC HEALTH PRACTITIONER PROGRAM

MODULE 1

Hands-on kit provided

HHP 1 - Holistic Health and Wellness – This course is an overview of our Holistic Health Practitioner program. You will learn the principles for living a balanced life. Learn how you will be able to help clients as a Holistic Health Practitioner. Start your journey to become a Holistic Health Practitioner by learning what Holistic Health is and applying what you learn to enhance your life and the lives of others.

HHP 2 - Alternative Medicine – This course will help establish your understanding of Alternative Medicine and provide the foundation for your holistic practice. Learn about living a healthy life and about treatments for illness. You will also learn about medical freedom and what it means for you and your clients.

HHP 3 - Holistic Self-care – This course is an overview of self-care principles. You will learn about the importance of physical, mental, and spiritual health in order to achieve a state of well-being. You will also work with tools to assess one's overall well-being.

HHP 4 - Healing Your Body – Learn why disease manifests in the body. How you can be healthier and help others too. You will also learn the essentials for leading a balanced life. Learn how to identify the problem, what to do about the problem, how to change, daily practice and emotional wellness.

HHP 5 - Reiki Empowerment - This course will introduce you to the basic concept of Reiki. This course is a great intro to get you started in energy healing. You can use the course

materials to introduce Reiki to others. The empowerment is simple to learn and easy to teach others. You will be able to practice doing self-healing, healing others and distance healing.

HHP 6 - Practical Reiki Healing - Kundalini Reiki Master – This is a very natural, simple and strong healing modality that is easy to learn and practice. This method will enable you to immediately access Reiki for self healing and healing others. There are no symbols to learn, no specific hand positions and attunements are easy to pass on to others. This healing method will awaken and balance the Kundalini energy, therefore creating balance of mental, physical and emotional clarity. A balanced state is the closest to perfection one can attain on earth. You will be a Reiki Master who can do healing sessions and also attune others to Reiki.

HHP 7 - Advance Reiki Techniques – Learn additional Reiki Methods to enhance your abilities. You will learn how to use Tachyon healing energy and how to pass attunements. Life force is the foundation for everything. It is highly intelligent and will automatically convert to the specific energy needed in the body. You will learn how to make Tachyon antennas and other Reiki methods.

MODULE 2

Hands-on kit provided
