

HISTORIC RESOURCE STATUS REVIEW REQUIREMENTS

A Historic Resource Status Review is required for your project if you can answer YES to BOTH of the following questions:

1. Does the project site contain a building constructed 45 or more years ago?
2. Does the project include demolition of all or any parts of the building, and/or any exterior alteration(s) of the building, and/or addition(s) to the building?

If a Historic Resource Status Review is required, please submit materials with your application:

1. Photographs of the building from each side that is accessible.
2. Original building permits and permits for any alterations that have been made to the building, if available.

The planner assigned to your case will review the materials with staff from the Office of Historic Resources of the Department of City Planning and contact you to confirm either:

1. The building is not of historic interest and the project can proceed.
- or
2. The building is of possible historic value and a second level of review will be required.

If a second level of review is required, the planner will inform you what further information is required.
